

ABSTRACT OF THE DISCLOSURE

A protective flashlight case includes left and right pieces with front and rear ends. The rear ends of the two case pieces are formed in a closed loop shape so as to enclose a key ring clip of a flashlight. A hollow space defined by the walls of the loop permits the case, with the flashlight enclosed, to be attached to a key chain, article of clothing, or other support. The case protects flashlights from harsh, rugged conditions as well as from water.
